BOTTLE COLOR	GREEN	GREEN

For almost 140 years Errázuriz have been making wines with a respect to the natural environment. Throughout this time, the Viña Errázuriz philosophy set by its founder, “From the best land, the best wine” has been carried forward by subsequent generations to the present day where environmentally friendly and sustainable practices are employed wherever possible. As part of this evolution, Errázuriz have been at the forefront of the development of lightweight glass in Chile and is one of the first major brand to export this light weight bottle on it’s premium range. With a 20% reduction in glass weight, Viña Errázuriz will significantly reduce its carbon footprint by reducing it’s shipping weight.
